ASX Announcement
28 April 2016

Quarterly Activities Report – Period Ended 31 March 2016

Acquisition of Nevada Lithium Projects

On 30 March 2016, Caeneus Minerals Ltd (“Caeneus” or “the Company”) entered into a binding Heads of Agreement (“HOA”) with private company Nevada Metals Pty Ltd (“Nevada Metals”) to acquire a 100% interest in the Lida Valley and Muddy Mountain Lithium Projects in West Nevada, United States (“Acquisition”). The Acquisition remains subject to satisfaction of conditions precedent including completion of due diligence and shareholder and all necessary regulatory approvals.

Capital Raising

During the quarter ended 31 March 2016, the Company successfully completed a capital raising of \$482,645 (before costs) via the issue of 482,645,223 fully paid ordinary shares at an issue price of \$0.001 per share to sophisticated and institutional investors of the Company (“Placement”). The Company will also be issuing 241,322,612 unlisted options on a 1 for 2 basis, exercisable at \$0.003 on or before 31 December 2020 (“Options”). The Options will be issued subject to shareholder approval at the upcoming General Meeting of the Company.

Funds raised from the Placement will be used to commence exploration works on the Lida Valley and Muddy Mountain Projects and to continue an active exploration program at the Pardoo Nickel Project.

Board changes

On 18 January 2016, Mr Steven Elliott was appointed as Managing Director of the Company following the resignation of Mr Antony Sage. The Board thanked Mr Sage for his significant contribution to the Company since December 2010. Mr Steven Elliott is a qualified geologist with over 30 years’ experience in mineral exploration. Mr Elliott has experience within Australia, Asia and North America and has been accredited and been involved in many exploration discoveries. Mr Elliott was the co-founding director of Helix Resources Limited (ASX: HLX) and founding director of Talisman Mining Limited (ASX: TLM).

Exploration

Lida Valley Project

The Lida Valley Project encompasses approximately 2,620 acres located in west-central Nevada, within 40km of the Silver Peak Lithium Mine of Albermale Corporation (NYSE: ALB), the only producing lithium mine located within North America (**Figure 1**).

The Lida Valley Project, like Silver Peak's Clayton Valley, is a significant regional Intermontane Basin with a drainage area of approximately 150km², and is considered by Caeneus to be an ideal location for the development of lithium rich brine deposits. About two-thirds of the world's lithium resources are within brines/salts. Capital and mining costs are typically far less in a brine deposit, given the lithium can be extracted from a liquid.

Muddy Mountain Project

The Muddy Mountain Project encompasses approximately 2,542 acres located in southeast Nevada, about 50km northeast of Las Vegas (**Figure 1**).

The Muddy Mountain Project is a potential high impact 'district-scale' lithium clay project. Lithium clay deposits (hectorites) display potentially cheaper operating costs compared to other hard rock projects such as pegmatites. Lithium clays are generally amenable to simple open-pit mining methods.

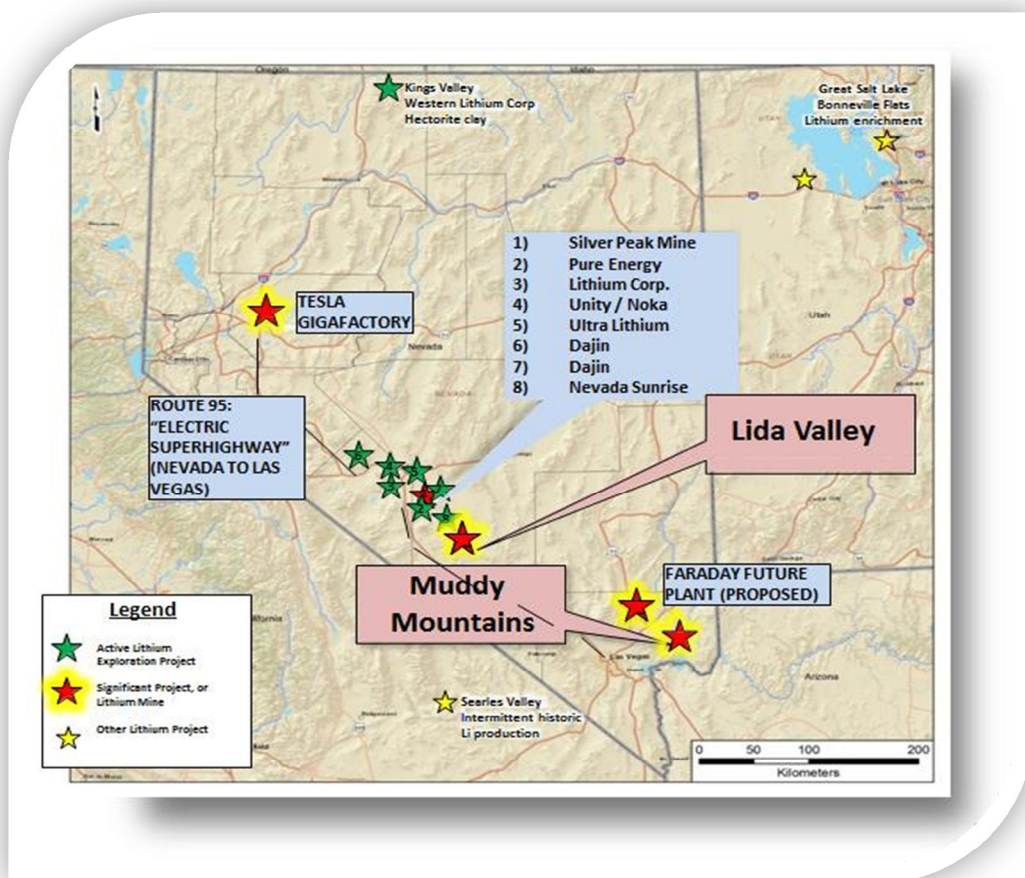

Figure 1: Lida Valley and Muddy Mountain Projects in West Nevada, USA showing location of the Tesla Motors Gigafactory and other lithium explorers and developers

Pardoo Nickel Project

The Pardoo Nickel Project is located in the Northern Pilbara, 100km east of the regional centre of Port Hedland. The Project is prospective for magmatic nickel-copper sulphides (**Figure 2**). A current inferred resource of 50mt @ 0.3% Ni and 0.13% Cu exists at the sedimentary hosted Highway Deposit.

Figure 2: Pardoo Project location map showing tenement portfolio.

Mt Dockrell - Application

During the quarter ended 31 March 2016, the Company made an application for Exploration Licence (EL) 80/4994 at Mt Dockrell in the Kimberley Mineral Field covering an area of approximately 306 square kilometres. The target mineralisation is lithium.

The information in this announcement that relates to Exploration Results, Mineral Resources or Ore Reserves is based on information compiled by Mr Steven Elliott who is a Member of the Australian Institute of Mining and Metallurgy. Mr Elliott is a director to the Company. Mr Elliott has sufficient experience which is relevant to the style and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 edition of the Joint Ore Reserves Committee (JORC) Australasian Code for Reporting of Exploration Results, Minerals Resources and Ore Reserves. Mr Elliott consents to the inclusion in the announcement of the matters based on his information in the form and context in which it appears.

For and on behalf of the Board

Steven Elliott
Managing Director

Notes

- 1 The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity wanting to disclose additional information is encouraged to do so, in a note or notes attached to this report.
- 2 The "Nature of interest" (items 6.1 and 6.2) includes options in respect of interests in mining tenements and petroleum tenements acquired, exercised or lapsed during the reporting period. If the entity is involved in a joint venture agreement and there are conditions precedent which will change its percentage interest in a mining tenement or petroleum tenement, it should disclose the change of percentage interest and conditions precedent in the list required for items 6.1 and 6.2.
- 3 **Issued and quoted securities** The issue price and amount paid up is not required in items 7.1 and 7.3 for fully paid securities.
- 4 The definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report.
- 5 **Accounting Standards** ASX will accept, for example, the use of International Financial Reporting Standards for foreign entities. If the standards used do not address a topic, the Australian standard on that topic (if any) must be complied with.
